

Long Range Terminals

Take your payments to your customers' location

Our long range wireless terminals allow you to take your payments with you and process payments anywhere. These are ideal for delivery services, kiosks, festival vendor booths and business professional services. These are all-in-one solutions with an integrated pin pad and printer. Phone lines and internet connections are not required to take advantage of these mobile solutions.

Verifone VX680G

This terminal keeps merchants on the move. The VX680G boasts a powerful processor for ultimate processing speed. You can keep the lines moving so customers don't have to wait. It is one of the fastest processors on the market today. It is easy to hold with a brilliant color display. It is ready to accept EMV chip card and mobile wallet payments.

Ingenico iWL250G

This all-in-one mobile payment terminal features an internal PIN pad and fast thermal printer allowing you to accept credit, PIN debit and EBT and gift cards anywhere you need. This terminal is a compact, hand-held design that offers a long battery life provides convenient and easy mobile payment acceptance. And it's ready for EMV chip cards, to protect you and your customers from counterfeit cards and fraud.

Converge Mobile

Accept payments anywhere you go using a smartphone or tablet. Customers simply sign the screen, and an electronic receipt is emailed to them. It's ideal for any business that needs to process transactions on the go.

Short Range Terminals

Pay at the table or in the back of the store with our Short RangeWireless Terminals.

Bring the point-of-sale to your customers. These terminals are ideal for table-service restaurants, garden centers, curbside pick-up, salons and more. These are all-in-one solutions with an integrated PIN Pad and printer. The short range terminals use secure, encrypted Bluetooth technology, allowing only the base and terminal to talk to each other, while also monitoring channels to prevent interference from other devices.
